1 Executive Summary

1.1 Product Overview

The Oyster Herbals Digital Commerce Platform is a customer-facing digital catalog and communication platform designed to support product discovery, customer engagement, and WhatsApp-based ordering. The platform enables customers to explore Ayurvedic remedies, review product information, read verified feedback, and initiate purchase inquiries directly with the clinic.

1.2 Business Purpose

The platform supports the digital transformation of Oyster Herbals by extending product visibility beyond traditional clinic operations. Through a centralized catalog and structured communication workflow, the business can improve customer accessibility while reducing administrative workload associated with manual inquiries.

1.3 Product Goals

- Establish a comprehensive online product catalog.
- Simplify ordering through WhatsApp integration.
- Improve customer trust through verified reviews and ratings.
- Enable efficient product management through an administrative dashboard.
- Support long-term business growth through scalable digital operations.

2 Product Overview

2.1 Product Description

The Oyster Herbals Digital Commerce Platform functions as a digital storefront that enables customers to browse products and initiate purchase requests. Rather than processing transactions directly, the platform routes inquiries to WhatsApp, allowing clinic staff to coordinate payment, shipping, and customer communication.

2.2 Business Context

Oyster Herbals and Panchkarma Centre has traditionally relied on physical visits and phone-based communication for product sales. This model limits customer reach and increases staff effort. The platform addresses these challenges by providing a scalable digital channel while preserving personalized customer interactions.

2.3 Key Stakeholders

lightgray Stakeholder	Role	Project Interest
Dr. Anshumaan	Business Owner and Physician	Revenue growth, brand reputation, and product quality.

Clinic Administration Staff	Operations and Order Management	Efficient catalog management and simplified customer communication.
Product Team	Product Planning and Delivery	Successful implementation and user satisfaction.
Customers	End Users	Convenient product discovery and purchasing experience.

3 Product Objectives

3.1 Business Objectives

- Expand product reach beyond local geographic boundaries.
- Reduce routine inquiry workload for clinic staff.
- Improve consistency of pricing and product information.
- Increase customer engagement through digital channels.

3.2 Customer Objectives

- Browse products easily from any device.
- Access accurate product information and pricing.
- Complete purchases through a simple communication workflow.
- Read trustworthy reviews from verified users.

3.3 Success Criteria

- Growth in monthly catalog traffic.
- Increase in WhatsApp inquiry volume.
- Reduction in manual pricing inquiries.
- Improved customer review participation.
- High customer satisfaction with browsing and ordering experiences.

4 User Roles

4.1 User Roles Matrix

lightgray User Role	Responsibilities	Permissions	Key Activities
Guest User	Explore products and evaluate wellness solutions.	View product catalog, search listings, read reviews, and initiate purchase inquiries.	Browse products, compare remedies, review pricing, and access WhatsApp ordering.
Registered User	Participate in the community through ratings and reviews.	All guest permissions plus review creation, review management, and account access.	Log in, submit ratings, write reviews, update feedback, and manage personal activity.
Administrator	Maintain platform content and ensure catalog accuracy.	Manage products, update pricing, upload images, and administer catalog information.	Create products, edit listings, remove outdated products, and maintain product information.

4.2 Role-Based Access Summary

lightgray Platform Capability	Guest	Registered User	Administrator
View Product Catalog			
Search Products			
Read Reviews			
Initiate WhatsApp Orders			
Submit Reviews	×		
Delete Own Reviews	×		
Manage Products	×	×	
Upload Product Images	×	×	
Update Pricing	×	×	

5 Feature Overview

5.1 Core Product Features

Feature Group	Feature Description	Business Value
Product Catalog	Displays product images, descriptions, pricing, dosage guidance, and wellness information.	Improves product visibility and reduces routine customer inquiries.
Product Search & Discovery	Allows customers to quickly locate products based on names, categories, or wellness needs.	Improves customer experience and supports higher conversion rates.
WhatsApp Ordering	Routes customers directly to WhatsApp using prefilled product inquiry messages.	Reduces checkout friction and simplifies customer communication.
User Authentication	Provides secure registration and login capabilities for customers.	Supports review authenticity and protects platform integrity.
Reviews & Ratings	Allows registered users to submit ratings and product feedback.	Builds customer trust through social proof and transparency.
Administration Dashboard	Provides tools for product creation, editing, image uploads, and pricing management.	Improves operational efficiency and catalog accuracy.

5.2 Feature Prioritization Summary

Feature	Priority	Business Justification
Product Catalog	Critical	Foundation of the digital commerce experience.
WhatsApp Ordering	Critical	Primary order initiation channel.

Administration Dash-board	Critical	Required for catalog management and pricing control.
User Authentication	High	Supports trusted customer participation.
Reviews & Ratings	High	Strengthens customer confidence and credibility.
Product Search	High	Improves navigation and product discovery.

6 Detailed Product Requirements

6.1 Product Requirements Register

lightgray ID	Requirement Description	Business Purpose	Priority
PRD-001	Responsive product catalog layout across all devices.	Provide consistent customer experience.	Critical
PRD-002	Dedicated product detail pages.	Enable informed purchase decisions.	High
PRD-003	WhatsApp click-to-chat ordering.	Simplify customer ordering workflows.	Critical
PRD-004	Prefilled WhatsApp order messages.	Reduce communication errors.	Critical
PRD-005	Secure password encryption.	Protect customer information.	Critical
PRD-006	User registration capability.	Support customer participation and reviews.	High
PRD-007	One review per user per product.	Maintain review quality and fairness.	High
PRD-008	Review deletion by review owner.	Allow customers to update feedback.	Medium
PRD-009	Product search functionality.	Improve product discovery.	High
PRD-010	Secure administrator dashboard.	Protect business operations.	Critical

PRD-011	Product create, update, and delete functionality.	Enable catalog management.	Critical
PRD-012	Cloud-based image management.	Improve performance and scalability.	High
PRD-013	Local image fallback capability.	Ensure catalog continuity during outages.	High
PRD-014	Average rating display.	Support customer trust and transparency.	Medium
PRD-015	Verified review identification.	Increase review credibility.	Medium
PRD-016	Administrative session timeout.	Improve platform security.	High

7 Functional Requirements

7.1 Functional Requirements Register

lightgray ID	Requirement	Description	Acceptance Criteria	Priority
FR-001	Product Catalog	Display product information and images.	Users can browse products and access detail pages.	Critical
FR-002	WhatsApp Routing	Redirect customers to WhatsApp ordering.	Chat opens with correct clinic number and product details.	Critical
FR-003	Product Search	Allow searching by name and category.	Search returns matching products accurately.	High
FR-004	User Registration	Allow customer account creation.	Duplicate emails are rejected.	High
FR-005	User Login	Provide secure customer authentication.	Valid credentials grant access successfully.	High
FR-006	Rating Submission	Allow registered users to rate products.	Only authenticated users can submit ratings.	High

FR-007	Review Deletion	Allow users to remove their own reviews.	Only review owners can delete reviews.	Medium
FR-008	Admin Authentication	Restrict dashboard access.	Only authorized administrators gain access.	Critical
FR-009	Product Creation	Enable administrators to add products.	New products appear immediately in the catalog.	Critical
FR-010	Product Editing	Enable modification of existing listings.	Updates appear accurately on live pages.	Critical
FR-011	Product Deletion	Enable removal of obsolete products.	Deleted products no longer appear in the catalog.	Critical
FR-012	Image Upload	Allow image uploads through the dashboard.	Only valid image formats are accepted.	High
FR-013	Image Fallback	Provide local image storage backup.	Images remain available during cloud failures.	High

7.2 Functional Requirements Summary

The functional requirements focus on three primary business capabilities:

- Product discovery and customer engagement.
- WhatsApp-based ordering and communication.
- Administrative management of products and catalog content.

Together, these capabilities support a seamless customer experience while providing Oyster Herbs with effective operational control over the platform.

8 Non-Functional Requirements

8.1 Non-Functional Requirements Register

lightgray NFR ID	Category	Requirement Description	Target Metric / SLA	Priority
---------------------	----------	-------------------------	---------------------	----------

NFR-001	Usability	The platform shall provide a fully responsive user interface across desktop, tablet, and mobile devices.	100% responsive experience.	Critical
NFR-002	Performance	The product catalog shall load quickly under normal operating conditions.	Average page load under 3 seconds.	High
NFR-003	Reliability	The system shall support local image storage when cloud uploads fail.	Zero failed listings due to image issues.	High
NFR-004	Security	Administrative sessions shall expire after inactivity.	30-minute time-out period.	Critical
NFR-005	Security	User credentials shall be protected using secure password encryption methods.	Industry-standard password protection.	Critical
NFR-006	Availability	The public catalog shall remain accessible to customers.	99.9% monthly uptime.	High
NFR-007	Scalability	The platform shall support future growth in products and reviews.	Query response time below 500ms.	Medium

9 Acceptance Criteria Summary

9.1 Feature Acceptance Matrix

Feature	Acceptance Criteria	Success Condition
Product Catalog	Display all active products with accurate pricing, descriptions, and images.	Customers can successfully browse all available products.
WhatsApp Ordering	Buy Now functionality launches WhatsApp with prefilled product information.	Customers can initiate orders without manual product entry.

User Portal	Support registration, authentication, and account management.	Users can create and access accounts securely.
Reviews & Ratings	Allow authenticated users to submit and manage reviews.	Customer feedback is displayed accurately and securely.
Administration Dashboard	Provide secure access to catalog management capabilities.	Administrators can manage products successfully.
Cloud Storage	Store and deliver product images efficiently.	Images remain available and load correctly.

10 Product Risks and Dependencies

10.1 Risk Register

lightgray Risk ID	Category	Risk Description	Probability	Impact	Mitigation Strategy
RSK-001	Technical Dependency	Changes to WhatsApp routing formats may impact ordering workflows.	Low	High	Use standard WhatsApp integration methods and maintain alternative contact options.
RSK-002	Brand Security	Spam or inappropriate reviews may affect brand credibility.	Medium	Medium	Require authentication for review submissions and monitor content.
RSK-003	Operational	Staff availability may impact response times to customer inquiries.	Medium	Medium	Implement communication templates and automated responses.
RSK-004	Technical	Cloud service outages may impact platform availability.	Low	High	Maintain reliable hosting and backup procedures.
RSK-005	Compliance	Product claims may create regulatory compliance concerns.	Low	High	Require physician review before publication.

10.2 External Dependencies

- WhatsApp communication platform.
- Cloud hosting and storage providers.
- Internet connectivity and infrastructure.
- Administrative staff availability.
- Regulatory compliance requirements for healthcare and wellness content.

11 Product Success Metrics

11.1 Key Performance Indicators (KPIs)

lightgray Metric	Target Goal	Measurement Method	Data Source
Catalog Traffic	20% month-over-month growth.	Monitoring monthly unique visitors and page views.	Website Analytics
Inquiry Volume	50+ product inquiries per month.	Tracking WhatsApp inquiry activity.	WhatsApp Business Records
Fulfillment Time	Less than 4 business hours.	Measuring response time between inquiry and confirmation.	Customer Communication Logs
Catalog Accuracy	100% pricing and product information accuracy.	Periodic content audits and catalog reviews.	Administration Dashboard
Platform Availability	99.9% monthly uptime.	Continuous uptime monitoring.	Hosting Platform Reports
Review Participation	Increase customer review submissions.	Monitoring review activity across products.	Platform Database
Customer Satisfaction	Maintain positive customer feedback levels.	Review ratings and customer comments.	Review Management System

11.2 Success Measurement Framework

The success of the Oyster Herbals Digital Commerce Platform will be evaluated through a combination of customer engagement metrics, operational efficiency indicators, and platform performance measurements. Continuous monitoring of these KPIs will support ongoing product improvement and strategic decision-making.

12 Conclusion

12.1 Product Vision

The Oyster Herbals Digital Commerce Platform bridges traditional Ayurvedic healthcare with modern digital accessibility. By combining an online product catalog, verified customer reviews, and WhatsApp-based communication, the platform creates a customer-centric digital experience while preserving personalized interactions.

12.2 Business Value

The platform provides significant business value by improving product visibility, reducing administrative workload, increasing customer engagement, and supporting scalable growth. The administration dashboard further enhances operational efficiency by enabling centralized catalog management and pricing control.

12.3 Expected Outcomes

Successful implementation is expected to increase market reach, improve customer satisfaction, strengthen brand credibility, and support long-term business growth. Through a combination of streamlined communication, trusted customer feedback, and efficient product management, Oyster Herbals can establish a sustainable digital commerce presence while maintaining its clinical reputation and personalized service approach.
