11.1 Product Delivery Strategy . . . . . 11

11.2 Expected Business Value . . . . . 11

11.3 Growth Roadmap . . . . . 11

# 1 Executive Summary

---

## 1.1 Purpose of Roadmap Planning

This report defines the feature prioritization framework and phased product roadmap for the Oyster Herbals Digital Commerce Platform. The objective is to ensure that high-value business capabilities are delivered first while providing a structured path for future enhancements and growth initiatives.

## 1.2 Business Context

Oyster Herbals has established strong credibility through its Ayurvedic clinic and wellness services but currently relies heavily on offline communication and manual sales processes. The roadmap supports a gradual digital transformation strategy by introducing online product discovery, WhatsApp-based ordering, customer engagement capabilities, and operational optimization features.

## 1.3 Key Outcomes

- Establish a phased product delivery strategy.
- Prioritize features based on business value and customer impact.
- Reduce operational inefficiencies through digital workflows.
- Improve customer acquisition and engagement.
- Create a scalable foundation for future platform growth.

# 2 Product Planning Overview

---

## 2.1 Product Vision Alignment

The roadmap aligns directly with the product vision of making physician-formulated Ayurvedic remedies accessible through a simple, trusted, and customer-centric digital platform. The delivery sequence ensures that customers can discover products, engage with the brand, and initiate purchases efficiently.

## 2.2 Business Objectives

- Expand product visibility beyond local markets.
- Increase customer inquiries and order volumes.
- Improve pricing consistency and catalog accuracy.
- Reduce administrative effort associated with manual communication.
- Build a trusted online brand presence.

## 2.3 Customer Objectives

- Browse products quickly and easily.
- Access accurate information and pricing.

- Initiate purchases through a simple communication channel.
- Read trustworthy reviews before making decisions.
- Experience a fast and mobile-friendly platform.

## 3 Prioritization Methodology

### 3.1 Prioritization Approach

A Value versus Complexity framework was used to evaluate platform capabilities. Features that deliver substantial business and customer value while requiring relatively lower implementation effort were prioritized for early releases.

### 3.2 Evaluation Factors

#### Business Value Factors

- Revenue enablement.
- Customer acquisition potential.
- Operational efficiency improvements.
- Brand credibility enhancement.

#### Customer Value Factors

- Ease of use.
- Trust and transparency.
- Accessibility and convenience.
- Communication effectiveness.

### 3.3 Priority Classification Model

| lightgray <b>Pri-<br/>ority</b> | <b>Definition</b>                                                                                        |
|---------------------------------|----------------------------------------------------------------------------------------------------------|
| Critical                        | Essential functionality required for platform launch and core business operations.                       |
| High                            | Important capabilities that significantly improve customer experience and operational control.           |
| Medium                          | Enhancement features that strengthen engagement and platform reliability.                                |
| Low                             | Future improvements and optimization initiatives that can be deferred without impacting core operations. |

## 4 Feature Inventory

### 4.1 Core Platform Feature Inventory

| lightgray Feature Area | Feature Name            | Description                                                                             | Target User              |
|------------------------|-------------------------|-----------------------------------------------------------------------------------------|--------------------------|
| Product Catalog        | Product Grid Display    | Displays products in a responsive catalog with names, prices, descriptions, and images. | Guest & Registered Users |
| Product Details        | Product Detail Pages    | Provides detailed information including ingredients, benefits, and usage guidance.      | Guest & Registered Users |
| Search Functionality   | Keyword Search Bar      | Allows users to search products by name, category, or wellness benefit.                 | Guest & Registered Users |
| WhatsApp Ordering      | Prefilled Order Message | Routes customers directly to WhatsApp with product details prefilled.                   | Guest & Registered Users |
| User Authentication    | Registration & Login    | Provides secure customer account management.                                            | Registered Users         |
| Reviews & Ratings      | Product Feedback System | Allows customers to submit ratings and written reviews.                                 | Registered Users         |
| Admin Dashboard        | Secure Admin Access     | Restricts catalog management functions to authorized administrators.                    | Administrator            |
| Product Management     | Catalog CRUD Operations | Allows creation, modification, and removal of products.                                 | Administrator            |
| Image Management       | Cloud Asset Storage     | Stores and manages product images efficiently.                                          | Administrator            |

## 5 Feature Prioritization Analysis

### 5.1 Value versus Complexity Prioritization Matrix

| lightgray Feature | Business Value | Customer Value | Complexity | Priority |
|-------------------|----------------|----------------|------------|----------|
|-------------------|----------------|----------------|------------|----------|

|                           |        |        |        |          |
|---------------------------|--------|--------|--------|----------|
| Product Grid Display      | High   | High   | Low    | Critical |
| WhatsApp Order Link       | High   | High   | Low    | Critical |
| Secure Admin Login        | High   | Medium | Medium | Critical |
| Catalog CRUD Control      | High   | Medium | Medium | Critical |
| Product Detail Pages      | Medium | High   | Low    | High     |
| User Registration & Login | Medium | Medium | Medium | High     |
| Cloud Image Storage       | Medium | Medium | Medium | High     |
| Keyword Search            | Medium | High   | Low    | High     |
| Ratings & Reviews         | High   | High   | Medium | Medium   |
| Local Image Fallback      | Low    | Low    | Medium | Medium   |
| Review Self-Deletion      | Low    | Medium | Low    | Medium   |

## 5.2 Prioritization Insights

The prioritization analysis demonstrates that catalog visibility, WhatsApp ordering, and administrative management capabilities deliver the highest immediate business value and therefore form the foundation of the MVP release.

Customer trust and engagement features such as reviews, ratings, and authentication are important but can be delivered after the core ordering workflow is operational.

Optimization features such as image fallback mechanisms and review management enhancements provide incremental value and are therefore scheduled for later releases.

# 6 Release Planning

## 6.1 Phase 1 – MVP Release (Months 1–2)

### Objectives

- Establish the digital presence of Oyster Herbals.
- Enable customers to browse products online.
- Launch WhatsApp-based ordering workflows.

- Provide administrators with catalog management capabilities.

**Included Features**

- Product Grid Display
- Product Detail Pages
- WhatsApp Order Link
- Secure Admin Login
- Catalog CRUD Control

**Expected Outcomes**

- Immediate online visibility.
- Structured digital ordering process.
- Improved pricing consistency.
- Reduced administrative inquiry workload.

**6.2 Phase 2 – Customer Engagement Release (Months 3–4)****Objectives**

- Build customer trust and engagement.
- Improve product discoverability.
- Encourage customer participation and feedback.

**Included Features**

- User Registration and Login
- Ratings and Reviews
- Keyword Search
- Review Self-Deletion

**Expected Outcomes**

- Increased customer trust.
- Growth in customer-generated content.
- Improved browsing and product discovery.
- Higher conversion rates.

**6.3 Phase 3 – Growth & Optimization Release (Months 5–6)****Objectives**

- Improve performance and scalability.
- Strengthen catalog reliability.

- Prepare the platform for future expansion.

### Included Features

- Cloud Image Storage
- Local Image Fallback
- Performance Optimization
- Catalog Reliability Improvements

### Expected Outcomes

- Faster page loading.
- Higher platform availability.
- Better customer experience.
- Improved operational resilience.

## 7 Product Roadmap

### 7.1 Phased Product Roadmap

| Release Phase                | Timeline   | Key Features                                                         | Primary Business Benefit                                    |
|------------------------------|------------|----------------------------------------------------------------------|-------------------------------------------------------------|
| Phase 1: MVP Foundation      | Months 1–2 | Product Catalog, Product Details, WhatsApp Ordering, Admin Dashboard | Launch digital presence and establish ordering workflows.   |
| Phase 2: Customer Engagement | Months 3–4 | Authentication, Reviews, Ratings, Product Search                     | Build trust, engagement, and customer participation.        |
| Phase 3: Optimization        | Months 5–6 | Cloud Storage, Image Fallback, Performance Improvements              | Improve reliability, scalability, and platform performance. |

### 7.2 Roadmap Alignment

The roadmap follows a progressive delivery strategy where revenue-generating and customer-facing features are prioritized first. Subsequent releases focus on customer trust, engagement, and long-term platform sustainability.

## 8 Dependency Analysis

### 8.1 Feature Dependency Matrix

| Feature              | Technical Dependency            | Operational Dependency             | Risk Level |
|----------------------|---------------------------------|------------------------------------|------------|
| WhatsApp Ordering    | Catalog Product Information     | Daily WhatsApp monitoring by staff | Medium     |
| Catalog CRUD Control | Administrative Dashboard        | Regular catalog maintenance        | Low        |
| Ratings & Reviews    | User Authentication             | Review moderation process          | Medium     |
| Cloud Image Storage  | Image Management Infrastructure | Cloud provider availability        | Medium     |
| Local Image Fallback | Image Upload Process            | Server storage capacity            | Low        |

### 8.2 External Dependencies

- WhatsApp Business communication services.
- Cloud hosting and storage providers.
- Internet and network infrastructure.
- Product image and content management processes.
- Regulatory compliance requirements for wellness product information.

## 9 Strategic Recommendations

### 9.1 Immediate Priorities (Phase 1)

- Launch the online product catalog and WhatsApp ordering workflow to establish a digital sales channel.
- Train clinic staff to maintain product information, pricing, and catalog accuracy through the administration dashboard.
- Standardize product descriptions and pricing policies to ensure consistency across all customer touchpoints.
- Promote the digital catalog during clinic visits and customer interactions to drive adoption.

### 9.2 Mid-Term Priorities (Phase 2)

- Launch customer accounts and encourage existing patients to submit verified reviews.
- Implement search functionality to improve product discovery and browsing efficiency.

- Introduce automated WhatsApp acknowledgements and inquiry responses.
- Build customer trust through visible ratings, testimonials, and review moderation practices.

### 9.3 Long-Term Priorities (Phase 3)

- Analyze customer search patterns and review activity to identify popular products.
- Improve platform performance and reliability through infrastructure optimization.
- Explore digital consultation capabilities and appointment management opportunities.
- Expand digital engagement initiatives to support customer retention and loyalty.

### 9.4 Strategic Recommendation Summary

| Time Horizon | Recommendation                                     | Expected Benefit                                      | Priority |
|--------------|----------------------------------------------------|-------------------------------------------------------|----------|
| Immediate    | Launch catalog and WhatsApp ordering capabilities. | Establish digital presence and generate inquiries.    | Critical |
| Immediate    | Enable administrator-led catalog management.       | Improve pricing accuracy and operational control.     | Critical |
| Mid-Term     | Introduce reviews, ratings, and customer accounts. | Increase trust and customer engagement.               | High     |
| Mid-Term     | Implement automated communication workflows.       | Improve customer responsiveness and satisfaction.     | High     |
| Long-Term    | Analyze customer behavior and demand trends.       | Support informed business decisions.                  | Medium   |
| Long-Term    | Evaluate digital consultation expansion.           | Create new service opportunities and revenue streams. | Medium   |

## 10 Success Measures

### 10.1 Roadmap Success KPIs

| Roadmap Goal | Key Performance Indicator | Target | Data Source |
|--------------|---------------------------|--------|-------------|
|--------------|---------------------------|--------|-------------|

|                        |                                    |                                    |                              |
|------------------------|------------------------------------|------------------------------------|------------------------------|
| Sales Enablement       | Monthly WhatsApp product inquiries | 50+ inquiries per month            | WhatsApp Business Records    |
| Operational Efficiency | Pricing consistency across catalog | 100% accuracy                      | Catalog Audit Reports        |
| Customer Trust         | Verified customer reviews          | 5+ reviews per major product       | Review Database              |
| Platform Performance   | Average page load speed            | Below 3 seconds                    | Performance Monitoring Tools |
| Platform Reliability   | Monthly uptime availability        | 99.9% uptime                       | Hosting Reports              |
| Customer Engagement    | Growth in returning visitors       | Continuous month-over-month growth | Website Analytics            |

## 10.2 Measurement Approach

Progress against roadmap objectives should be reviewed regularly through analytics dashboards, operational reports, customer feedback, and platform performance metrics. Continuous measurement ensures that roadmap investments remain aligned with business goals and customer expectations.

# 11 Conclusion

## 11.1 Product Delivery Strategy

The Oyster Herbals Digital Commerce Platform follows a phased delivery strategy that prioritizes business-critical functionality before introducing engagement and optimization capabilities. This approach minimizes implementation risk while maximizing early business value.

## 11.2 Expected Business Value

The roadmap supports digital transformation by increasing product visibility, simplifying customer communication, improving operational efficiency, and creating a structured foundation for future growth. Each release phase contributes measurable value while strengthening the overall customer experience.

## 11.3 Growth Roadmap

As the platform matures, Oyster Herbals will be positioned to expand beyond a simple digital catalog into a broader wellness ecosystem. Future enhancements driven by customer insights, operational data, and market demand will support continued growth, stronger customer relationships, and increased regional reach.
